

HEARING SCREEN REPORT

Student: {{student_name}}

Date: {{date_of_screening}}

DEAR PARENT(S)/GUARDIAN(S):

We recently conducted hearing screenings at the school. Unfortunately, we were unable to screen your child due to their **absence** on the screening day.

Since hearing plays a big role in speech, language, and learning, we recommend regular hearing evaluations. Even a mild or temporary hearing loss—such as from ear infections or wax buildup—can impact a child’s ability to communicate and excel in school.

If your child hasn’t had a recent hearing test or if you’ve noticed any signs of hearing difficulties, we encourage you to talk with your doctor and/or audiologist.

Signs That May Suggest Hearing Difficulties:

- Trouble understanding or following instructions
- Unclear speech
- Not responding to name or environmental sounds
- Frequent requests for repetition (e.g., saying, “What?” or “Huh?”)
- Complaints of ear pain, ringing, or noises in the ear(s)
- Turning up the volume on the TV or music devices
- Speaking loudly or watching lips closely when listening to others
- Challenges with reading or academic progress

If you have any concerns or would like guidance on what to do next, please do not hesitate to reach out to us or your school. Your child’s success and well-being are our top priorities, and we’re here to help!
