

HEARING SCREEN REPORT

Date: {{date_of_screening}}

Dear {{student_name}},

Your hearing screening results showed that your hearing fell **within the expected range**, with no concerns observed.

Please note that hearing screens are a general tool to identify potential concerns and are not a substitute for comprehensive audiological assessments. We encourage you to continue attending regular hearing evaluations with your healthcare provider, especially if you notice changes in your hearing.

Signs That May Suggest Hearing Difficulties:

- Trouble understanding or following conversations
- Difficulty hearing in noisy environments
- Frequently asking others to repeat themselves
- Turning up the volume on devices
- Ringing or noises in the ear(s)
- Speaking loudly or straining to hear others

If you experience any of these signs or have concerns about your hearing in the future, we encourage you to consult an audiologist and/or physician.

Thank you for your participation and commitment to your health and well-being!
